Skills

Backend & Architecture: NestJS, Node.js, TypeScript, JavaScript, ASP.NET Core (.NET 8), C#, Clean Architecture, CQRS, Repository & Unit of Work, RESTful APIs

Databases & Caching: MongoDB (Mongoose, Aggregation Pipelines), SQL Server, MySQL, Entity Framework Core, LINQ, Redis.

Third-Party Integrations: ZaloPay Payment Gateway, GHN API, Viettel Post API, AWS S3, Firebase Authentication (OTP SMS), Firebase Storage.

DevOps, Security & Tools: Docker, PM2, IIS, Git, GitLab, GitHub, Swagger/OpenAPI, JWT Authentication, RBAC, Validation, Logging & Retry Mechanisms.

Education

Bachelor of Software Engineering
08/2019 - 07/2023
Duy Tan University
GPA: 3.64/4.0

Professional Summary

Backend Engineer with hands-on experience designing, building, and optimizing production-grade RESTful APIs using **NestJS, TypeScript, Node.js, and .NET**. Proven track record in delivering multi-platform e-commerce, digital ordering, and logistics systems featuring complex database query optimization, third-party payment and shipping integrations, and Role-Based Access Control (RBAC). Strong focus on Clean Architecture, highconcurrency data consistency, secure coding, and seamless collaboration with frontend and mobile teams.

Work Experience

Backend Developer (NestJS / TypeScript)
HIFIVEPLUS | 11/2025 - 11/2026

- **E-Commerce Ecosystem (HappyCo, Vmix, Vinabill, Bep Nha Thu)**: Designed and developed modular production RESTful APIs using **NestJS, TypeScript, MongoDB, Redis, and AWS S3** serving web and mobile ecommerce applications.
- **Order Lifecycle & Pricing Engine**: Engineered end-to-end order management covering cart workflows, instant buy-now flows, admin order creation, dynamic pricing, voucher validation logic, real-time inventory updates, and ZaloPay payment integration.
- **Database & Query Optimization**: Optimized complex multi-collection data lookups using **MongoDB** Aggregation Pipelines and Redis caching to significantly reduce API response times under high traffic.
- **Resilient Logistics Integrations**: Implemented comprehensive DTO validation, centralized error handling, structured logging, and automated retry mechanisms for third-party shipping carriers including **GHN and Viettel Post**.
- **Architecture Refactoring**: Refactored core backend services following DRY and Clean Architecture principles, reducing codebase duplication by **40%** and standardizing Swagger API contracts for frontend/mobile teams

Backend Developer (.NET / Web Systems)
Khang Thi | 11/2024 - 11/2025

- **iMenu – Digital Menu & Smart Ordering (menudientu.com)**: Delivered a full-featured smart ordering platform adopted by 50+ F&B businesses nationwide using .NET 8, CQRS, Clean Architecture, and SQL Server; integrated real-time table/order updates, sales reporting, Firebase OTP SMS authentication, and Firebase Storage image offloading
- **Provincial Digital Transformation Portals (Quang Tri, Quang Ngai, Dak Lak)**: Built and deployed eGovernment modules for citizen registration, online form submission, document tracking, and admin dashboards aligned with Vietnam's National Digital Transformation roadmap
- **High-Concurrency Optimization**: Contributed to database performance tuning and batch processing for thousands of concurrent users handling mass form submissions and Excel data exports/imports.
- **Logistics Automation**: Engineered real-time truck scale management modules for logistics operations with strict role-based authorization (RBAC) and secure coding practices in an Agile environment.

IT Intern (Web Development)
Vinacen | 02/2023 - 05/2023

• Built responsive website UI and supported feature development using HTML, CSS, Bootstrap, jQuery, and AJAX.
• Assisted with testing, documentation, and implementation of internal features.
